Into the project

AUT MIND

Into the project

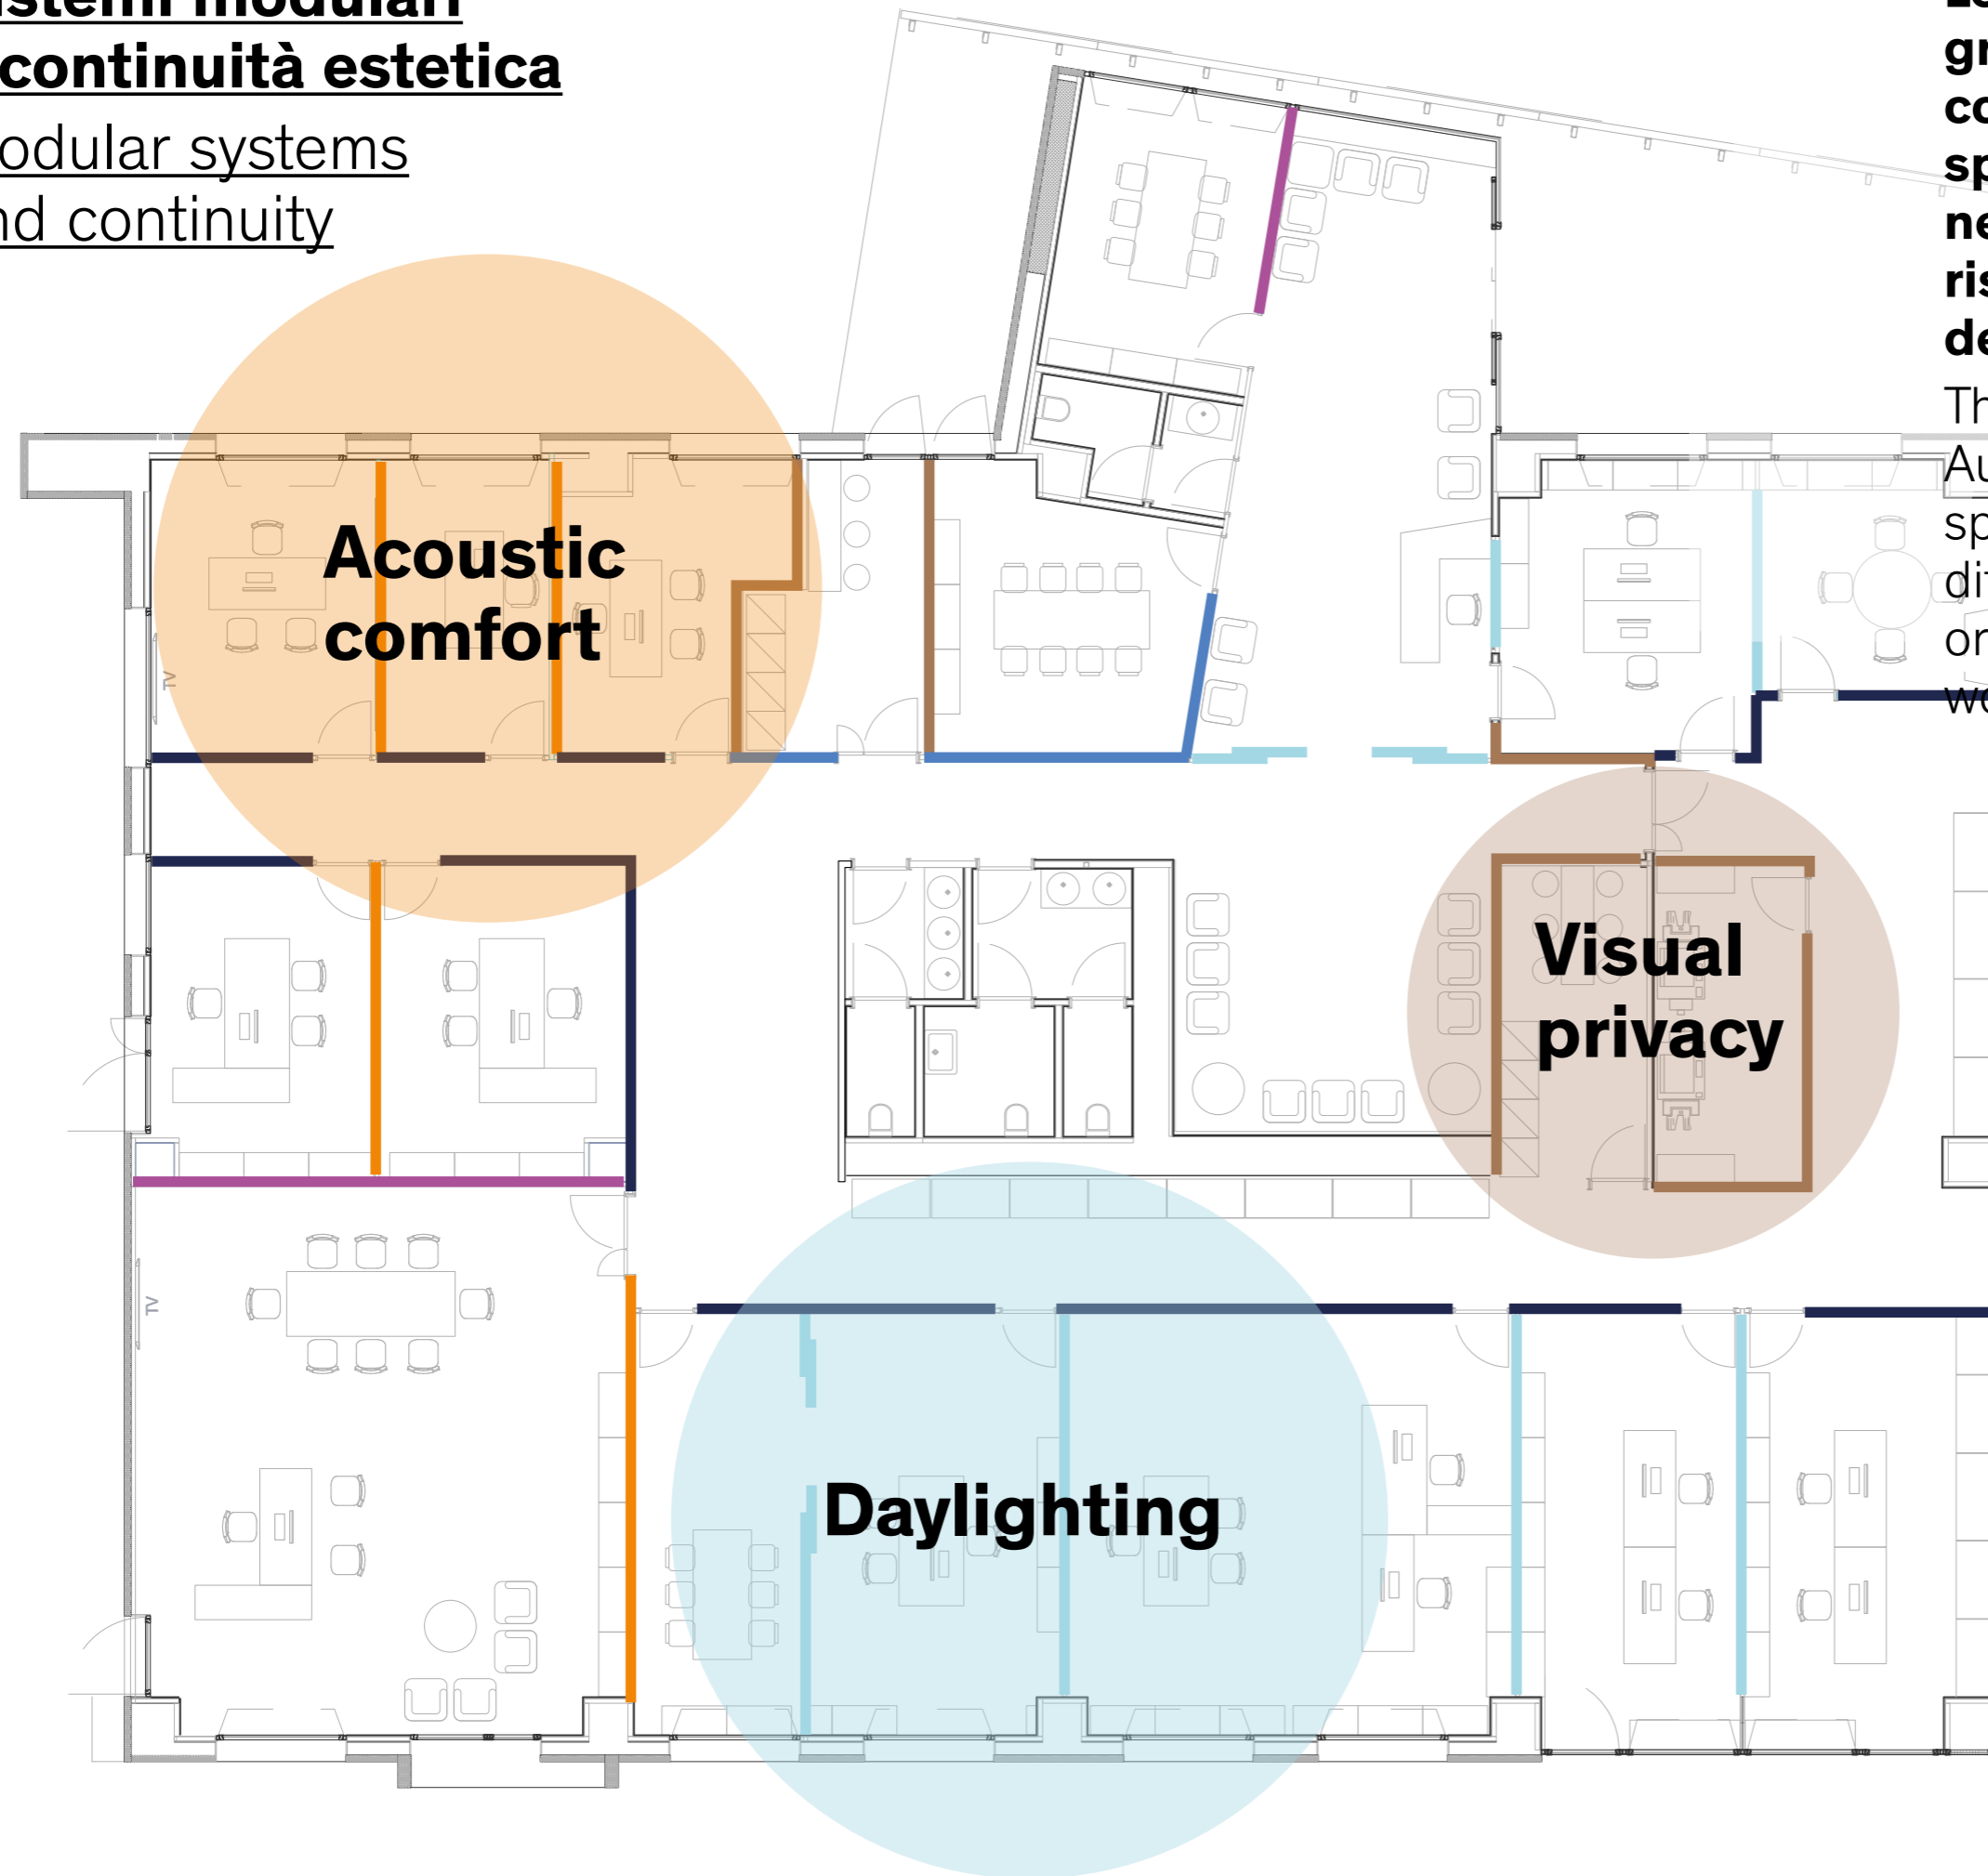

Dinamici e multitasking, i luoghi del lavoro accolgono funzioni diverse e accompagnano attività che cambiano nel corso della giornata: con un approccio orientato al mondo del progetto, Autmind interpreta le pareti divisorie come sistemi integrati nell'architettura che contribuiscono a rendere gli ambienti confortevoli favorendo il benessere delle persone che li vivono.

Dynamic and multitasking, these new workplaces accommodate different functions and activities throughout the day: with a personal approach, Autmind designs partition walls as integrated into the architecture contributing to environmental comfort and promoting the well-being of the people who live there.

Sistemi modulari e continuità estetica

Modular systems
and continuity

Le pareti divisorie Autmind grazie alla loro modularità consentono di ripartire gli spazi secondo le diverse necessità funzionali per rispondere alle esigenze dello spazio lavoro.

Thanks to their modularity, Autmind partition walls divide spaces according to the different functional needs, in order to meet the needs of each work space.

Parete divisoria singola
leggera e versatile

Versatile and minimalistic
single glass partition wall

Slim

Partition wall

**Slim, parete dal profilo
sottilissimo, che permette
di suddividere gli spazi
in modo leggero e con
il minimo impatto visivo.**

Slim Solutions divides spaces lightly
and with minimal visual impact
thanks to its extremely thin profile.

location: Treviso, Italy
project: Andrea Gaio Architetto
product: Glass Partition wall

Double

Partition wall

**Parete divisoria doppia
ad alte prestazioni**

**High performance double
glass partition wall**

Double può accogliere vetri con diversi gradi di trasparenza e pannelli di molteplici spessori e tipologie; può inoltre integrare porte a battente sia anta singola che doppia. Può essere aggregata alla parete monovetro Glass per offrire soluzioni combinabili e modulabili.

The Double partition wall is composed by glasses with different degrees of transparency and panels of multiple thicknesses and types; it can also support single and double swing doors. The Double can be combined with the Glass single-glazed partition to offer combinable and modular solutions.

**Un sistema
flessibile**
Flexible system

6030

The wall system

Con il suo binario unico e le molteplici combinazioni possibili 6030 è il sistema di pareti divisorie tra i più compatti in commercio.

With its single rail and multiple possible combinations, 6030 is one of the most compact partition wall systems on the market.

Material library

L'abaco di materiali e finiture, esito di un accurato lavoro di ricerca e selezione, offre numerose combinazioni per incontrare tutte le specificità del progetto e inserirsi in ogni contesto architettonico.

The abacus of materials and finishes is the result of careful research and selection, offering numerous combinations to satisfy each project and fit into any architectural context.
